

Articulation Agreement between Hudson Valley Community College, A.S. in Environmental Science with The Sage Colleges, Applied Biology: Env Sci. B.S.

Objective

This articulation agreement is intended to facilitate the transfer of qualified students currently enrolled in the A.S. Degree in Environmental Science into the B.S. Applied Biology program at the Sage Colleges. Counselors at Hudson Valley Community College can use the information in this agreement to advise current students as they express an interest in the Applied Biology, B.S. program as to which HVCC courses should be taken prior to application for transfer.

Terms of Agreement

This articulation agreement, once signed, will be effective immediately and must be reviewed and re-approved in the same manner at least once every two years hereafter, in order to remain in effect.

The procedure of review and re-approval shall be as follows:

The latest available catalogs of the two institutions are reviewed by the Sage Colleges Program Coordinator and the revised draft is prepared by the Sage Colleges Program Coordinator.

A final draft is signed by the department chairs of both institutions and by the appropriate administrator of both institutions.

All of the most recently published rules for accepting transfer students into programs at the Sage Colleges apply. The agreement supplements, but does not supersede or replace, what was written in the latest catalog.

The Sage Colleges agrees to accept and transfer into the B.S. program up to 66 credit hours earned by the student at Hudson Valley Community College, who takes the courses listed below. Only courses of earned grades of C- or better will transfer, and students who attain a combined Grade Point Average of 2.5 in courses will automatically be admitted into the Sage Colleges Applied Science Program.

This agreement covers courses taken at Hudson Valley Community College only. If students from HVCC have credits on their transcripts from other institutions, the published Sage Colleges rules for accepting transferred credit will apply to those credits.

If students from HVCC wish to transfer without having completed all of the courses in this agreement, they are assured that the identified equivalent courses with C- or better will transfer, but outright admission into the program will not be guaranteed. If admitted, junior status at the Sage Colleges will be attained, if 54 or more of the credits are transferred. All transfer students must meet with an Applied Biology advisor to plan their courses and to determine how many semesters are required for degree completion.
